**DETAILED ACTION** 

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who

has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371° of this title before the invention

thereof by the applicant for patent.

2. Claims 1-4, 7, and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Arena

et al (US5635093).

Arena et al discloses a heat treatment apparatus, which comprises a heat treatment table

(4) for a substrate to be treated, concentrically arranged heaters (8), temperature sensors (12)

arranged in one line in a diameter direction which are used to arithmetically surmise the amount

of heat supplied to each region of the heat treatment table, and a control means which controls

the heaters based on the surmised temperature (column 3, lines 53-67; column 4, lines 1-21;

Figures 1-2).

Allowable Subject Matter

Claims 8-9, and 11-12 are objected to as being dependent upon a rejected base claim, but 3.

would be allowable if rewritten in independent form including all of the limitations of the base

claim and any intervening claims. This case would be in condition for allowance if the allowable

subject matter of dependent claims 8-9 and 11-12 were included in independent claims 1 and 3.

The following is a statement of reasons for the indication of allowable subject matter: the 4.

prior art of record neither discloses nor suggests a heat treatment apparatus wherein the sensors

disposed in the heat treatment table are disposed in a thickness direction.

Conclusion
